

Clean Power Alliance

Locally powered energy innovation.

**Clean Power Alliance believes in a
clean energy future that is local,
where communities are
empowered and customers are
given a choice about the source
of their energy**

What is Clean Power Alliance?

Your new option for electricity

The Clean Power Alliance is a new electricity supply provider, offering **clean, renewable energy at competitive rates** to our community

Who are we?

- A not-for-profit public entity formed through a Joint Powers Authority (JPA), comprised of 32 member public agencies in Ventura and Los Angeles Counties
- Locally governed by the members and staffed by a experienced team of industry experts
- 1 million customer accounts representing 3 million people

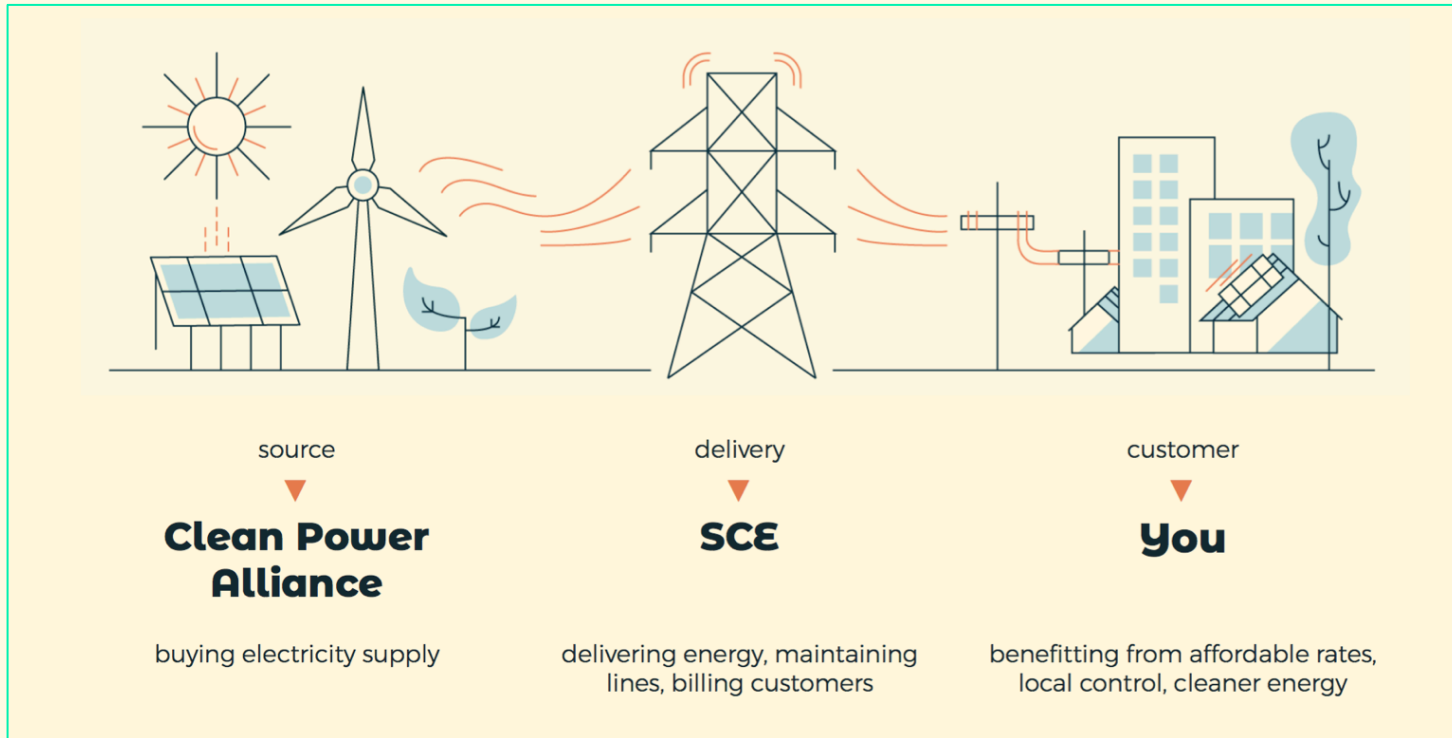

Where are we in the launch process?

1. February 2018 – service launched for municipal customers in unincorporated LA County
2. June 2018 – service launched for commercial customers in unincorporated LA County and all non-residential customers in Rolling Hills Estates and South Pasadena
3. February 2019 – service launched for all residential customers
4. **May 2019 – service expanding to all remaining non-residential customers**

How does it work?

Clean Power Alliance purchases clean power. Southern California Edison delivers it. You benefit.

Clean Power Alliance offers choices

Three rate options to suit the needs of your family or business – all with higher renewable content than SCE

Lean Power provides 36% renewable energy content at the lowest possible cost, 1-2% more affordable than Southern California Edison base rates

Your community's default selection

Clean Power provides 50% renewable energy content at the same price as Southern California Edison's base rates

100% Green Power provides 100% renewable energy content at a 7-9% premium as compared to Southern California Edison's base rates

Your choice makes a real difference

- CPA will procure as much renewable energy as needed to meet our customers' demand.
- CPA procurement has already resulted in new renewable generation being built in Southern California. We are currently negotiating a portfolio of cost-competitive long-term contracts for new solar, wind, and battery storage around the region.
- CPA expects to reach state-mandated 2030 renewable energy goals in 2019 – **11 years ahead of schedule.**

What if I Need Financial Assistance Paying My Bill?

California Alternate Rates for Energy (CARE) Program

You participate in a public assistance program or meet income requirements

The **CARE Program** reduces energy bills for eligible customers by about 30%.

Family Electric Rate Assistance (FERA) Program

You have a family of 3 or more, participate in a public assistance program or meet income requirements

The **FERA Program** reduces energy bills for eligible customers by about 12%.

Medical Baseline Program

If you or someone in your household needs electrically powered medical equipment or meets income requirements

The **Medical Baseline Program** supplies additional energy at no extra cost to your normal energy use to keep your devices going.

Customers do not need to re-enroll for these programs, administered by SCE.
New, interested applicants can call SCE at 800-447-6620 or visit www.sce.com/care.

Understanding Your Bill

Utility bills can be confusing, but Clean Power Alliance strives to keep it simple. Southern California Edison (SCE) will still send your monthly bill, but instead of SCE charges for both electricity supply and electricity delivery, your bill will show Clean Power Alliance charges for electricity supply and SCE charges for delivery.

Clean Power Alliance is NOT an added fee; we will simply replace SCE's electricity supply charges.

Solar panels and Net Energy Metering (NEM)

Clean Power Alliance supports local distributed generation

- Clean Power Alliance customers with rooftop solar panels or other generating systems can receive bill credits that offset energy charges, and get cash back when they generate more power than they use in a year.
- Existing NEM customers do not have to reapply to be enrolled in CPA's NEM program.
- CPA will settle net credits and charges on a monthly basis so that customers won't experience a large bill at the end of each 12-month period.
- Customers will continue to receive an annual SCE settlement for NEM delivery credits/charges.

NEM customers save/earn in two ways:

Monthly generation credits and annual Net Surplus Compensation

1. NEM customers receive generation charges or credits each month based on the retail value of energy generated or consumed at different times of the day.

Net Generator without Retail Credit			Peak	kWh Total	Retail Price	Charges
TOU-GS-2-A	Summer	Generation - Lean Power	On-Peak	100	0.36935	\$ 36.94
TOU-GS-2-A	Summer	Generation - Lean Power	Mid-Peak	-200	0.09244	\$ (18.49)
TOU-GS-2-A	Summer	Generation - Lean Power	Off-Peak	-100	0.02264	\$ (2.26)
			Total	-200		\$ 16.18

Net Consumer with Retail Credit			Peak	kWh Total	Retail Price	Charges
TOU-GS-2-A	Summer	Generation - Lean Power	On-Peak	-300	0.36935	\$ (110.81)
TOU-GS-2-A	Summer	Generation - Lean Power	Mid-Peak	200	0.09244	\$ 18.49
TOU-GS-2-A	Summer	Generation - Lean Power	Off-Peak	400	0.02264	\$ 9.06
			Total	300		\$ (83.26)

2. NEM customers may also receive **Net Surplus Compensation (NSC)** each year, in April, if their total generation is greater than their total energy use over the course of that period.
 - o Clean Power Alliance provides an NSC that is always 10% higher than SCE's.

NEM customers have options

- Clean Power Alliance allows NEM customers to earn more from Net Surplus generation, receive more renewable energy from the grid when they generate less than they use, and support community choice and local control.
- Current NEM customers' existing charges or credits will be settled, or "trued up", by SCE before enrollment with CPA.
- If a NEM customer prefers not to have an SCE true-up now, any true-up resulting from CPA enrollment in February can be reversed by opting out before **March 31**. NEM customers who opt out by this date can return to CPA with six months notice.

How is Clean Power Alliance financed and governed?

Community Choice Aggregators are different from investor-owned utilities

- CPA's operations and small staff are funded exclusively by customer payments for electricity consumed. CPA receives no taxpayer subsidies and is not guaranteed a rate of return or cost recovery.
- Board members are local elected officials from the County of Ventura, the County of Los Angeles, and each of our 29 member cities. Board members are not compensated for their service. Board meetings are open to the public and subject to the Brown Act.
- Like other energy providers CPA is regulated by the California Public Utilities Commission for grid reliability, renewable energy portfolio standards, and tracking and reporting of power content and greenhouse gas emissions.
- Unlike investor-owned utilities, as a Community Choice Aggregator CPA's local board sets rates and procurement policies.

How is Clean Power Alliance financed and governed?

Net revenues will stay in our communities and generate multiple benefits

- As a not-for-profit public entity, CPA has no shareholders or dividend payouts. Once a reserve has been established net revenues will be returned to our customers and communities via stable, low rates and investment in local programs that address community priorities.
- Investment priorities will be established in 2019 through a strategic planning process engaging our Board, Community Advisory Committee, and the public.
- Other CCAs have invested in programs ranging from electric vehicle rebates and charging station infrastructure, community solar and battery storage for emergencies and community resilience, to smart thermostat demand-response programs and clean jobs training.

Clean Power Alliance rates will remain competitive

- Clean Power Alliance rates are set by the board of directors. Our aim is to set rates annually for stability and predictability.
- SCE rates are expected to go up in 2019 for everyone, whether your energy comes from Clean Power Alliance or from SCE.
- Clean Power Alliance's board is committed to maintaining CPA rates within the prescribed ranges compared to SCE rates – including delivery and surcharges – for each renewable energy tier.

Why it's important
